Profile Statement

Third-year B.Tech Computer Science student (graduating 2028) building full-stack web applications with React, Node.js/Express and MySQL. Built and deployed a 20+ page role-based portal with JWT authentication during an internship at LNMIIT, and led a team of 3 to ship a working MVP in a 72-hour hackathon. 225+ LeetCode problems solved. Seeking a Software Engineer / full-stack internship for Summer 2027.

Technical Skills

Languages: Python, C, C++, JavaScript
Frontend: React, React Router, HTML5, CSS3, Axios
Backend: Node.js, Express.js, REST APIs, JWT authentication
Databases: MySQL, Supabase, MongoDB
ML / Data: Pandas, NumPy, Scikit-learn
Tools: Git, GitHub, Docker, VS Code, Figma, Vercel, Render

Experience

LNMIIT (The LNM Institute of Information Technology) **Jaipur, Rajasthan**
Website Developer Intern – Director's Office Portal *June 2026 – July 2026*

- Built 20+ React.js pages for a role-based portal that digitizes the Director's Office workflow: meeting requests, visitor approvals, calendar, documents, tasks, and announcements.
- Designed role-based access for 4 user roles (Director, Secretary/Admin, Faculty/Staff, External Visitor) using protected routes (React Router DOM) and JWT authentication, so each role sees only its own dashboard and actions.
- Implemented a drag-and-drop Kanban task board and a color-coded calendar with month, week, and list views.
- Connected the React frontend to a Node.js/Express REST API with Axios; deployed the frontend on Vercel and the backend on Render with automatic redeploys on every GitHub push.

Projects

TrustLens – Scam Detection Platform | ***Supabase, Solana, AI APIs*** *Jan 2026 – Feb 2026*

- Led a team of 3 to deliver a working MVP in a 72-hour hackathon: a platform that scores online communities for scams, spam, and fake engagement using AI APIs.
- Built the backend on Supabase, covering authentication, database management, and real-time updates.
- Integrated a Solana-based token workflow with on-chain verification.

Loan Pre-Eligibility Prediction System | ***Python, Scikit-learn, Pandas*** *Feb 2026 – May 2026*

- Built a classification pipeline that predicts loan pre-eligibility from applicant financial and demographic features, including missing-value handling, categorical encoding, and normalization.
- Trained and compared multiple classification models, evaluating them on accuracy and F1-score.

Lost & Found Management System | ***Node.js, MySQL, HTML/CSS/JS*** *Oct 2025 – Nov 2025*

- Built a full-stack campus lost-and-found app with item reporting, search, and status tracking on Node.js and MySQL.
- Replaced notice-board and WhatsApp-based coordination with one searchable system for reporting and recovering items.

Education

JK Lakshmipat University **Jaipur, Rajasthan**
B.Tech in Computer Science and Engineering *June 2024 – June 2028*

- **CGPA:** 7.56/10 — **Relevant Coursework:** Data Structures, DBMS, Operating Systems, Computer Networks

Hackathons & Certifications

- **LNMIIT Hackathon (LNM Hack)**, Jan 2026
- **Smart India Hackathon (SIH)**, Sep 2025 , Reached Round 2
- **LeetCode:** 225+ problems solved across Easy, Medium, and Hard
- Tata Cybersecurity Analyst Job Simulation (Forage), Dec 2025
- Red Hat System Administration I (RH124) coursework, May 2026
- Coursera: Machine Learning Foundations | Infosys Springboard: Database
